Engineering Excellence in Testing
and Assembly Line Automation

OUR VISION

Our goal is to supply our customers with reliable and ongoing automation solutions. Our offering will be focused on increasing client productivity.

OUR MISSION

To build a company that is sincere in making sure that its workers are qualified and productive, and that is motivated and developing new techniques .

Vision Ahead & Strategic

We are shaping the future of *Grubbs* manufacturing through intelligent automation—integrating AI, machine learning, and digital twin technology for smarter testing, predictive maintenance, and optimized design. Our vision is to expand into emerging sectors such as aerospace, renewable energy, and precision medical manufacturing while driving sustainability through energy-efficient, resource-conscious automation aligned with global ESG goals.

ABOUT US

WHO WE ARE

WE OFFER ENGINEERING SOLUTION

We offer complete production and installation of automated machinery using the most recent technological developments and a competitive advantage to minimize downtime. We provide engineering solutions for equipment for end-of-line inspection, performance testing, leak testing, machining automation, assembly automation, and other applications.

Industrial Automation Excellence

Class Ultimate delivers turnkey industrial automation solutions that minimize downtime and enhance operational performance through advanced engineering.

Comprehensive Service Scope

We specialize in assembly line automation, PCB testing, machining automation, performance testing, leak testing, and end-of-line inspection systems.

Custom Solutions Across Industries

Our automation systems are tailored for sectors such as automotive, general engineering and medical industries, prioritizing speed, accuracy, and reliability.

Innovation-Driven Engineering

Equipped with the latest technical advancements, our solutions ensure our clients maintain a competitive edge in their manufacturing processes.
